PRODUCT DATA SHEET

INLET FILTER KITS

edwardsvacuum.com

Enhanced vacuum pump protection

During demanding applications, vacuum pumps are continuously exposed to contaminants, dust, and abrasive particulates. Our Edwards Inlet Filter Kits safeguard your pump, ensuring reliable performance and extended operating life.

These inlet filter kits are inline vacuum filters installed directly before the pump inlet to remove dust and impurities from the pipeline. They ensure consistent protection in light and medium duty applications.

Designed to maintain long-term efficiency, they are ideal for all rough vacuum pump technologies.

Features and benefits

Effective filtration

Paper and polyester elements offer 90+% filtration and 5 µm particle removal.

Quick replacements

Stainless steel torsion clips enable quick filter changes during maintenance.

Easy to install

Each inlet filter kit comes with all pipe fittings and components for easy installation.

High capacity

High particle holding capacity reduces cleaning frequency and minimises pressure drop.

Tough build

Durable carbon steel casing is corrosion-resistant and ideal for humid environments.

Secure seals

Leak-proof O seal prevents any loss of pressure throughout operations.

We recommend using our inlet filters with these vacuum pumps

nES Oil-sealed rotary vane pump

nEDC Dry claw vacuum pump

EDO Dry scroll vacuum pump

Technical data

Specifications	Description
Element	Polyester & paper filter element with efficiency of 99+%
Polyester	Medium to heavy duty (Moist process), washable
Paper	Light duty application (Dry process), not washable
Casing	Carbon steel
Surface finish	Black or grey paint
Temperature for continuous operation	Min. -26°C Max. 104°C
Change of filter element	After 37-50 mbar over initial Δ P

We recommend installing filter kits on all compatible pumps to protect performance and extend service life, even in clean applications. For processes involving high levels of dust or particle ingress, inlet filter kits are strongly advised to ensure reliable and uninterrupted operation.

Ordering information

Inlet filter kits with NPT connections (Kits only for North America)

Description	Kit PN*	Replacement element PN
Kit Inlet filter ½" polyester	8090360101	8090360115
Kit Inlet filter 1¼" polyester	8090360102	8090360115
Kit Inlet filter 1¼" polyester oversized	8090360103	8090360116
Kit Inlet filter 2" polyester	8090360104	8090360117

Inlet filter kits with G/BSPP connections (Kits for Europe, South America and Middle East)

Description	Kit PN*	Replacement element PN
Kit Inlet filter ½" paper	8090360121	8090360137
Kit Inlet filter ½" polyester	8090360122	8090360138
Kit Inlet filter 1¼" paper	8090360123	8090360139
Kit Inlet filter 1¼" polyester	8090360124	8090360140
Kit Inlet filter 1¼" paper oversized	8090360141	8090360133
Kit Inlet filter 1¼" polyester oversized	8090360118	8090360134
Kit Inlet filter 2" paper	8090360119	8090360135
Kit Inlet filter 2" polyester	8090360120	8090360136

Inlet filter kits with G/BSPP connections (Kits for Asia-Pacific)

Description	Kit PN*	Replacement element PN
Kit Inlet filter ½" polyester	8090360158	8090360166
Kit Inlet filter 1¼" polyester	8090360159	8090360167
Kit Inlet filter 1¼" polyester oversized	8090360160	8090360168
Kit Inlet filter 2" polyester	8090360161	8090360169

**Kit PN includes filter housing, filter element and fittings*
